

**Welcome** to the 35th Emergency Abdominal Surgery Course. This is the first face to face course in over 2 years.

The first was held in Letterkenny Donegal Ireland in May 2012. This course builds on previous success and is further enhanced by a large international and national faculty who are at the coal face in Emergency Surgery.

EASC curriculum focuses solely on the acute abdomen, in a multidisciplinary shared learning approach. It will bring you a level of discussion you have not heard before and enhance your ability on-duty as surgeon in training. This course is about decision making in patients with common emergencies. The course is endorsed by many societies and is the EGS course for the World Society of Emergency Surgery [www.wses.org.uk](http://www.wses.org.uk)

### **Course Goals**

- Natural history of the acute abdomen
  - Key management strategies
  - Key mistakes to avoid
  - Optimum surgical approach
  - Dealing with complications

### **Who should attend ?**

If you deal with acute abdominal pain patients, then this course is a must for you.

You will receive a synoptic view of the current literature and refreshments during the day

Michael Sugrue Convenor
